

IDEAS

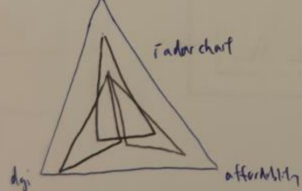

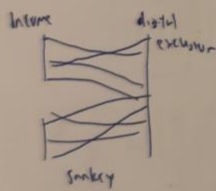

Overall ADII score

Main income sources

heatmap (correlation) between income, wealth, digital metrics

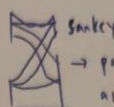

FILTER

polar area

→ too similar to radar chart, radar can show more data

→ pathway might not be as relevant as other graph

heatmap

→ might keep - but might steal map attention as it's big

Categorize

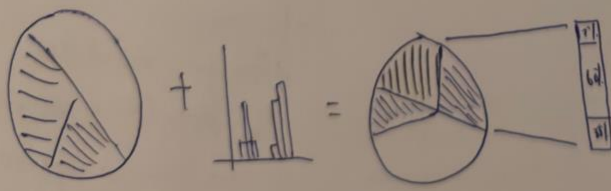

Digital inclusion map

Overall ADII score bar graph

ADII Trends by Quintile line chart

ADII components radar chart

COMBINE and REFINE

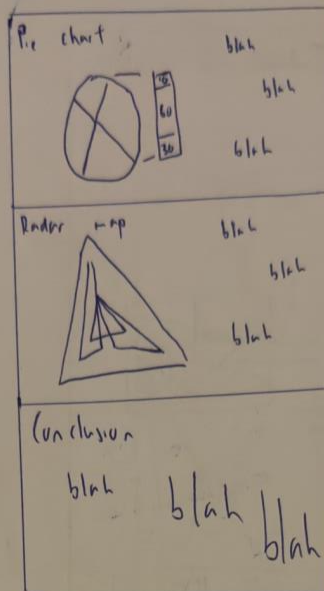

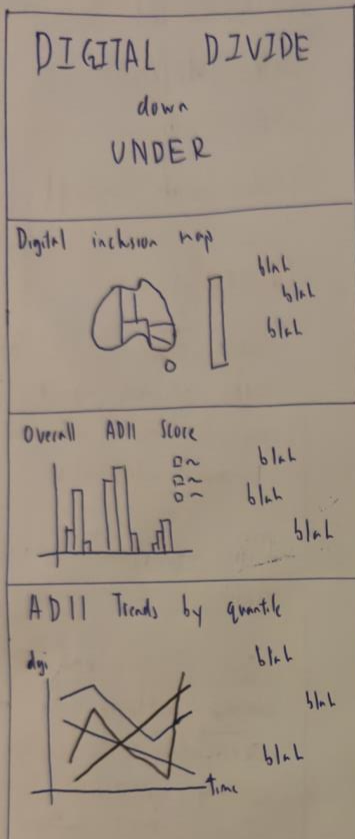

the old pie chart was only showing digital metrics like access or affordability, combining the stacked bar chart idea gives us to show case sub metrics like attitudes, basic skills etc.

QUESTION

- 1) will it be feasible? implementable?
- 2) does it actually fulfill the approach of "Digital Divide Down Under!"

LAYOUT

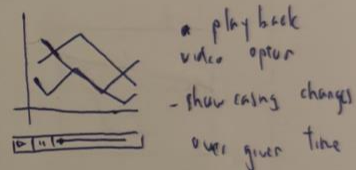

TITLE : Slideshow
AUTHOR : Teh Yee Hong
DATE : 1 OCT 2025
SHEET : 2
TASK : BROADCASTING

OPERATIONS

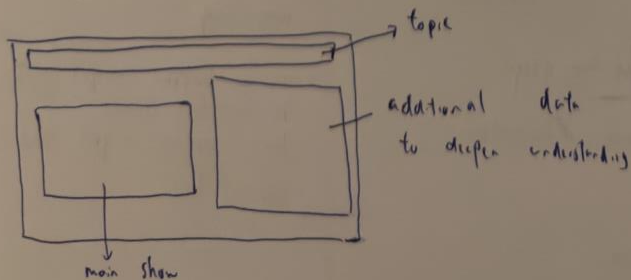

Filter option
only showing those that are
chosen

FOCUS

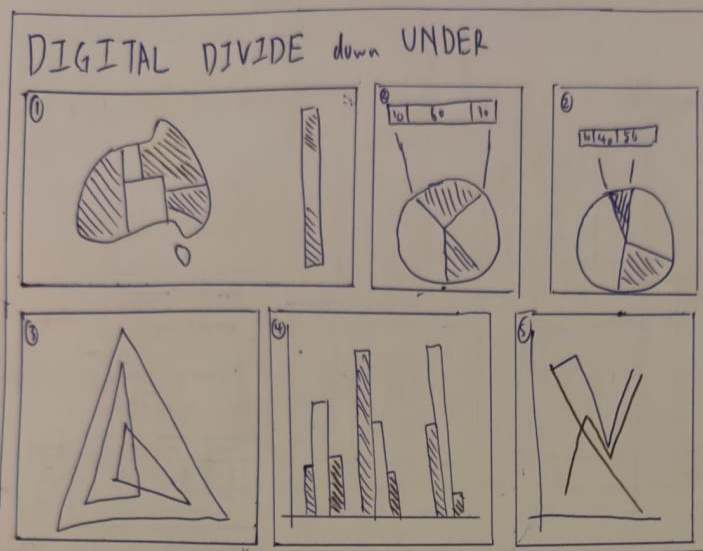

- all graph is being focused, as there will only be one graph per slide
- all eyes on one

DISCUSSION

- narrative control
- weak user interactions
- super easy to follow
- require someone to progress
- break down a big chunk into smaller ones.

LAYOUT

① choropleth map
- digital inclusion map

② pie chart
- main income sources
- tenure

③ radar chart
- compare digi metrics

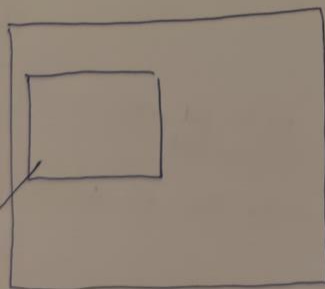

④ grouped bar graph
- overall ADII score

⑤ line chart
- ADII Trends by Quantile

FOCUS

- no main focus
- everything viewed at once

map still biggest, could somehow attract focus

TITLE: POSTER

AUTHOR: Teh Yee Hong

DATE: 1 OCT 2025

SHEET: 3

TASK: DASHBOARD

OPERATIONS

- radar graph will have filter functions (to ease vision)

- hovering mouse on to any graph will show relevant data

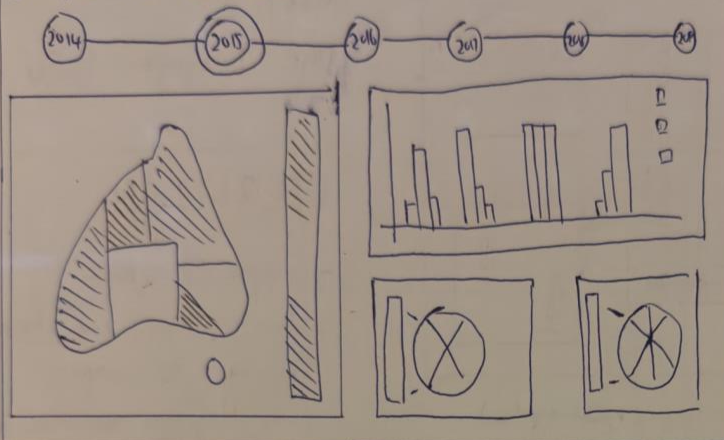

- pie chart will be combined with a bar graph, so when the sector is pressed in pie chart, a bar graph will appear (if feasible)

DISCUSSION

- too packed
- no focus
- less engagement
- flat

LAYOUT

DIGITAL DIVIDE down UNDER

Similar to sheet 2

but the focus more on timeline

Where graphs will change according to year requested

FOCUS

- no graph is focused
- but timeline is focused instead
- allow users to view data in different years

TITLE: POSTER 2

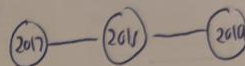

AUTHOR: Teh Yee Hong

DATE: 1 OCT 2025

SHEET: 4

TASK: TIMELINE POSTER

OPERATIONS

↑
pressable, when pressed graph will all change to data to that year

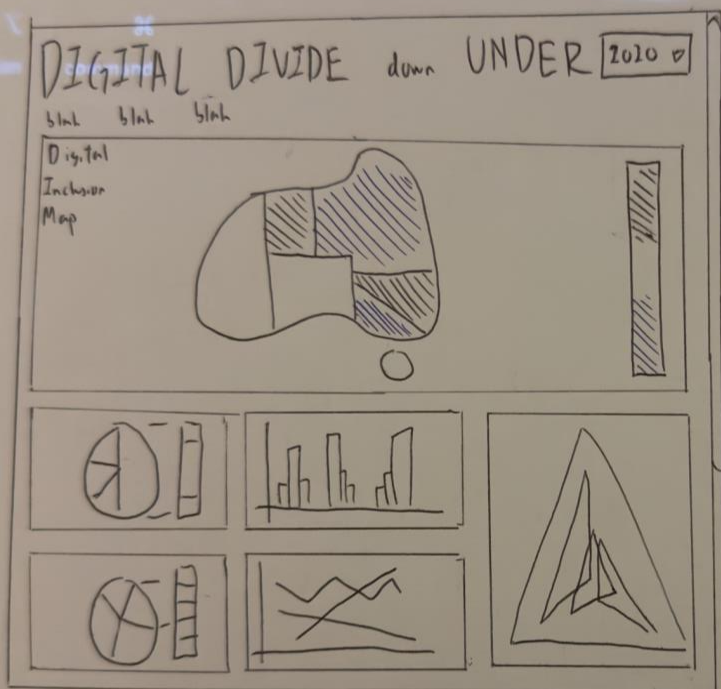

↑
pie chart remains interactable, showing a bar chart of chosen area

DISCUSSION

- more interactive, engaging
- too packed
- more information to be explored by users

LAYOUT

The idea here is to make it scrollable, while before scrolling the map is all you see timeline function is also available

TITLE: FINAL DESIGN

AUTHOR: Teh Yee Hong

DATE: 2 Oct 2025

SHEET: 5

TASK: Final Implementation Design

OPERATIONS

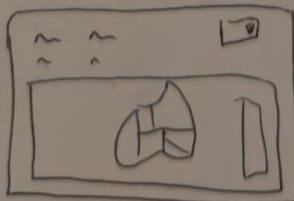

- tooltip added
- scrollable, before scrolling to focus on map, scroll to see more additional data
- timeline function from the drop down at top right corner of page

2020 ▾

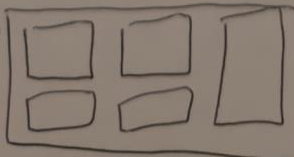

FOCUS

- before scrolling will focus on map as it's all can be seen
- after scroll will have no focus

before (top)

after (bottom)

DETAILS

- Dependencies: vuejs, html, css
- clean data
- estimated time for implementation: 1 week
- good screen
